## About us

Koy Lab is a company that specializes in printing and manufacturing digital photography albums. Founded in 1977 as a photo lab, by the hand of a professional photographer who wanted more than what he had available. We soon started our search for new challenges.

40 years have passed and we are still a family business, which we believe is one of the aspects that makes us unique. We preserve our heirloom and never let go of our past, which allowed us to get us where we are today, but we focus on the future, for which we work in the present.

By offering limitless ways for you to customize your albums, we enable you to deliver an outstanding product for your clients to preserve their most cherished moments. We use only the finest materials and provide endless possibilities. From weddings, to newborn and maternity, family sessions and portfolios we have range of products that fits every single need, perfect for any occasion.

# Quality, tailored-made albums for professional photographers worldwide

*Our team, or as we like to call it, our Koy Family is full of dexterous hands from different generations and it also includes our clients, who are the focus of everything we do.*

The essence of what sets us apart lays on how we combine the tradition of our production systems to the innovation of our products.

By combining years of learned craftsmanship with the latest printing technologies we are able to handcraft each product into a unique piece of art for our clients.

Every detail defines and distinguishes each piece we create. For this reason, we monitor the whole process, from its design to its trims, and thoroughly inspected every step to ensure our top quality standards, not just to meet your expectation, but to exceed them.

# Materials

A close-up photograph of a book cover. The top portion of the cover is a dark brown material with a fine, woven or tufted texture. Below this is a smooth, black material, likely leather or a high-quality synthetic material, which forms the spine and the bottom edge of the cover. The book is shown at an angle, highlighting the different materials and their textures.

Choose from a wide range of bicast leathers for the album covers.
